

A GAME WE ENJOY

Why do we like to play shuffleboard? Because we meet people like ourselves, trying to make life a little more worthwhile. Most of us like companionship, and some very long-lasting friendships result from our meeting on the shuffleboard courts. And, too, playing this game of mild exercise helps us to relieve our minds of worry, illness, etc.

What a peace of mind to know we can tell one another why we made such a bad shot: "I got the wrong color on that old drifty, slow court. It just didn't go where I aimed to shoot," trying to convince ourselves that it wasn't our fault. Seriously the pleasure we have in this great sport makes it worth the effort and time spent many times over.
