The above pictures of world top-notch shufflers are designed to show the basic and important techniques used in facing, aiming and gripping of cue, weight distribution, stepping during delivery and follow-thru to achieve a coordinated and graceful sequence of movements. IN REVIEW: Grip your cue lightly, aim along shaft of cue, aligning cue shaft, center of disc and your target, move forward easily and smoothly allowing your arm a free swinging motion; follow thru with the swing to eliminate a jerky motion that will disrupt your aim. PRACTICE FOR DIRECTION PRACTICE FOR DISTANCE. PRACTICE WILL MAKE YOU A BETTER SHUFFLER.
