

Winning Ways

Strategy and accuracy are "Kissin Kin."
especially in shuffleboard
If you expect to win

But experience has taught us all
That a level court is rare
So learn to shoot your "lags"
with the very greatest care.

If shuffleboard is your love and
The score boards in your eye.
Remember that every game you play,
Can't end up in a tie.

Never give up hope
When your score is far behind,
Since many a game is won
with a strong determined mind

Now Lady Luck is always waiting
To shift things either way,
so just do the best you can
and hope she "makes your day"!

But let me add just one more thing
That winning always takes two!
So try to pick a partner,
That's better than you.
